

Accessories Brochure

HARRIS XG-75P

SMALLER.  
LOUDER.  
LIGHTER.  
TOUGHER.

The XG-75 is simple to operate  
so users can focus attention  
on the situation rather  
than radio operations.

The XG-75 delivers reliable  
clear voice quality,  
secure communications,  
proven interoperability,  
and multi-mode operation including:  
P25, OpenSky2™, and EDACS®.

Weighing just 15.8 ounces with  
the Lithium-Ion battery, each aspect  
of the radio has been developed  
to provide a better user experience.  
The knobs and buttons of the XG-75 are  
designed to be strong enough to protect  
against impact and are shaped to avoid  
incidental changes while still being easily  
managed by users wearing heavy gloves.

Robust, long-life  
batteries and  
time-saving chargers...

# BATTERIES AND CHARGERS

**A CHARGER, 6-BAY,  
LI-ION/POLYMER  
MAEV-CH4B**

Save time by charging up to six batteries at once. Charge batteries with or without the radio attached. Not for use with NiCd and NiMH batteries. *Optional wall mount kit sold separately.*

**B VC4000 VEHICULAR,  
TRI-CHEMISTRY CHARGER  
MAH2-VC4PB**

Mount in a vehicle or use on a desk. Charges NiMH and Li-Ion batteries in about 1.5 hours. Provides microprocessor-controlled charging for long battery life and maximum battery performance. Charge batteries with or without the radio and speaker mic attached.

**C 3600 MAH LITHIUM  
POLYMER BATTERY  
MAEV-PA2U**

The highest capacity Harris battery for single-band radios. The battery has an average 16-hour shift life, 400 charge cycles, and maintenance-free technology. IP67 rated for immersion and dust/dirt particle intrusion.

**D 2000 MAH  
LITHIUM ION BATTERY  
MAEV-NPA9Y**

Lightest battery available in the Harris portfolio. This battery is rated for 12 hours under use of 5-5-90. IP67 rated for immersion and dust/dirt particle intrusion.

When being heard  
from any environment  
is critical...

# MICROPHONES

## **A** SPEAKER MICROPHONE

MAEV-NAE9D

### WITH EARPHONE LAPEL ATTACHMENT

MAEV-NAE3Z

Our standard microphone includes a rubber PTT button, an emergency button, two-position volume control, and earphone jack.

*Earphone Label Attachment sold separately.*

## **B** HIGH-VISIBILITY SPEAKER MICROPHONE

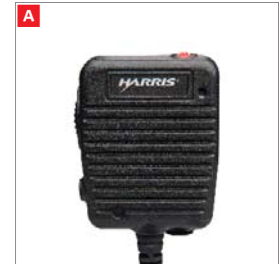

EV-AE4C

Designed specifically for firefighters, this rugged microphone includes a yellow rubber PTT button, an emergency button, yellow removable grill, an accessory jack, and Watertight Accessory Connector. The microphone is Immersion Rated to 1 Meter.

## **C** GPS SPEAKER MICROPHONE

MAEV-NAE9R

For use with radios on P25, OpenSky™ and EDACS® systems, this speaker microphone includes a rubber PTT button, an emergency button, and GPS-only antenna.

Built rugged for  
extensive daily use...

# CARRY ACCESSORIES

**A LEATHER CASE WITH SHOULDER STRAP**  
MAEV-NHC2D

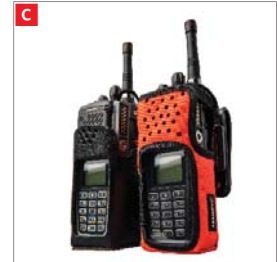

Quality leather strap securely holds snug fitting leather case over uniforms for a comfortable convenient way to carry your radio.

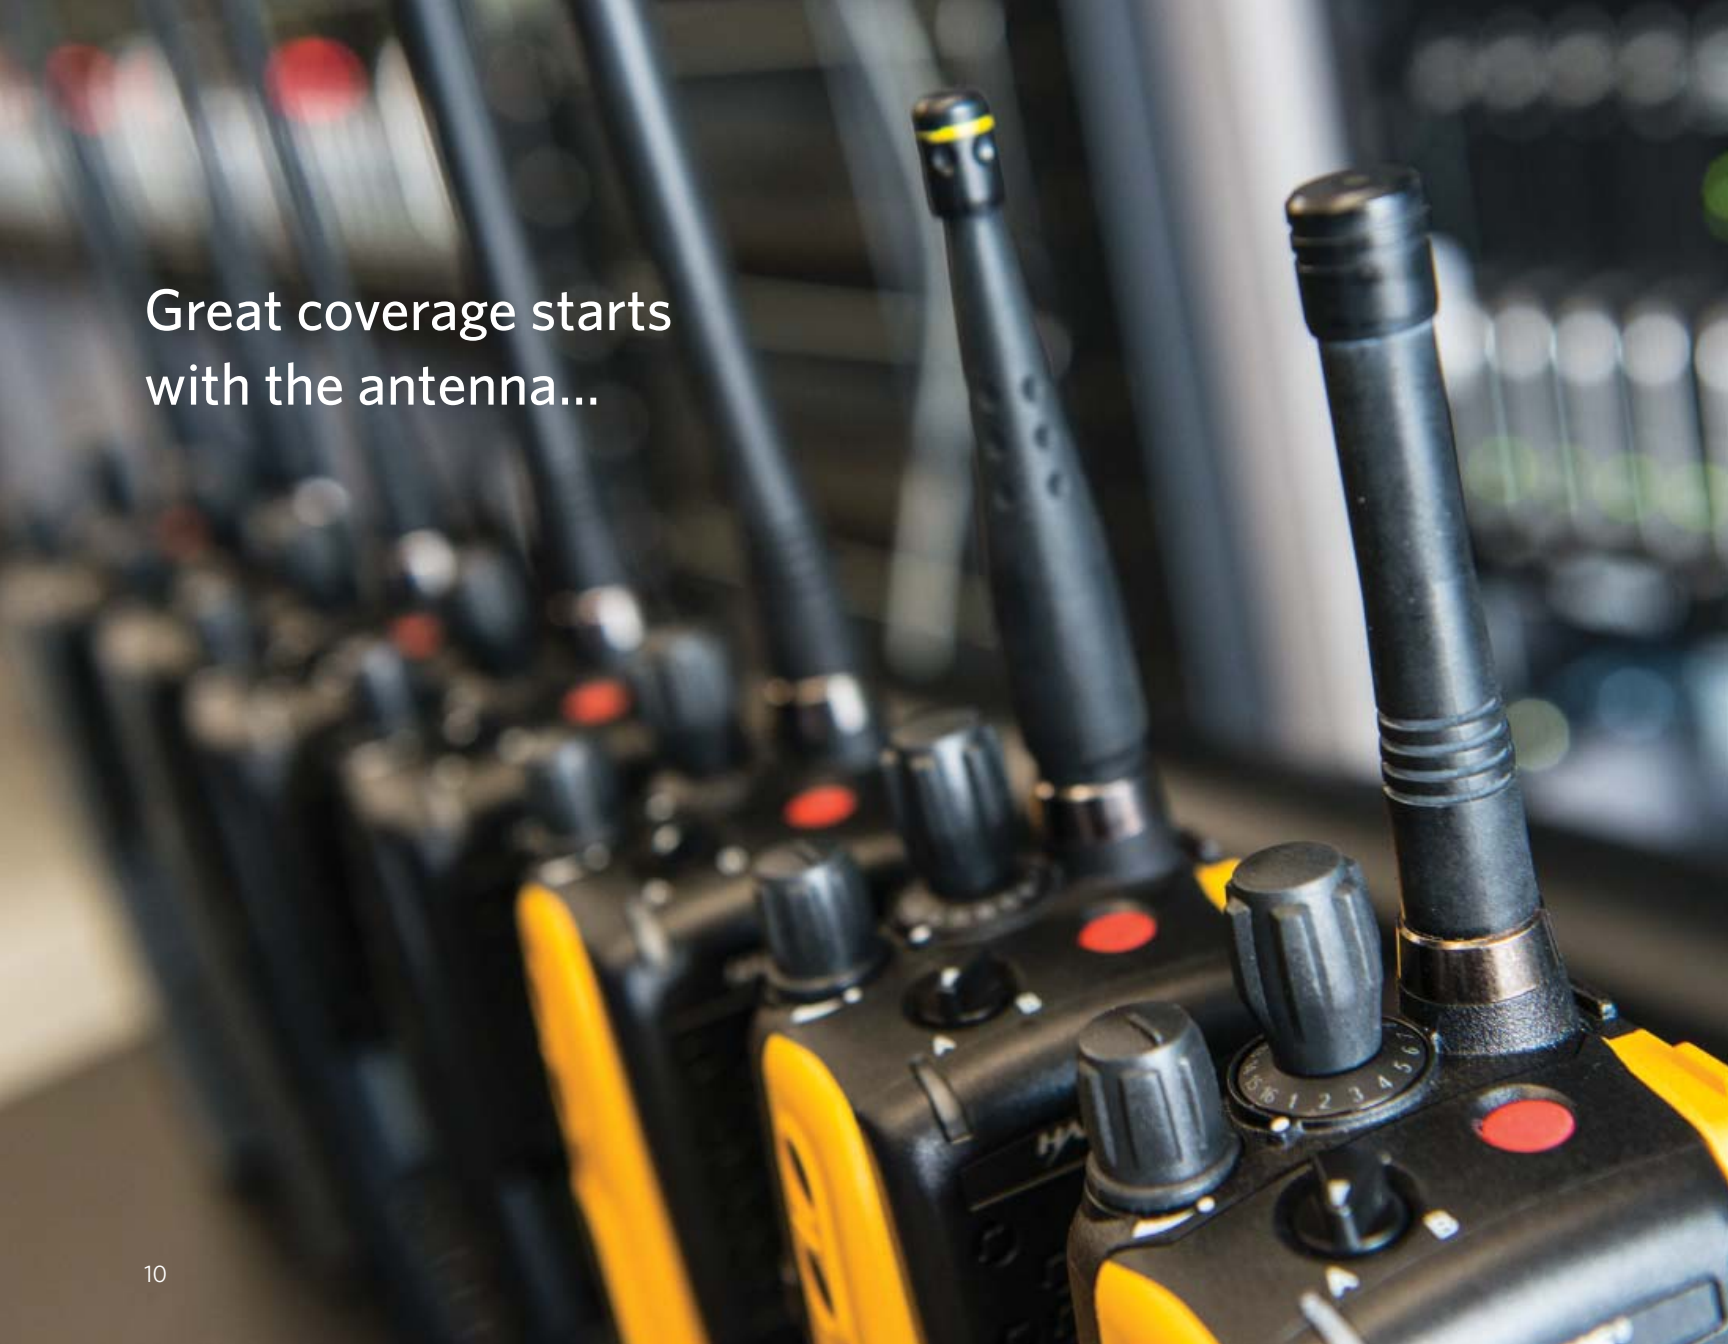

**B LEATHER CASE WITH BELT LOOP**  
MAEV-NHC2C

Made of quality leather, this case includes a heavy-duty belt clip to comfortably secure the radio to equipment belt. *Swivel mount sold separately.*

**C NYLON CASE WITH BELT LOOP**  
ORANGE (MAEV-NHC2B)  
BLACK (MAEV-NHC2A)

Snug fitting design keeps radios secure in even the most rugged of industrial applications. *Available in black or safety orange.*

Great coverage starts  
with the antenna...
