

The Bluetooth Covert Earpiece

- Facilitates discreet wireless communications
- Operates with XL-200P, Unity[®] XG-100P, and XG-25P portables and Harris' BeOn[®] application on Android[™] cell phones
- Withstands the rigors of severe environments

Ideal for use in challenging undercover mission-critical environments or non-covert operation, the Bluetooth Covert Earpiece delivers secure and reliable wireless communications. The unit provides clear audio and dependable performance with XL-200P, Unity XG-100P, and XG-25P portables and Harris' BeOn application on Android cell phones. Included with the earpiece are the PTT unit, AC wall charger, and USB/charging cable.

Compatible with Bluetooth Version 2.1 + EDR, the earpiece provides secure simple pairing and encrypted communications. This Class 2 device has a 10-meter operational range for clear audio while still allowing freedom of movement.

Discreet Operation for Surveillance Activities

The Bluetooth Covert Earpiece was created specifically for high performance in discreet undercover activities. Users may PTT their portables while the radios are concealed. With BeOn on Android cell phones, users may plug ear buds with a built-in wired microphone into the phone and use the covert device as a PTT and emergency remote control. Users appear to be listening to music or participating in a phone call but are

in full communications with their talkgroup.

Non-covert Operation

The Bluetooth Covert Earpiece also may be used with the BeOn application for non-discreet activities. Users attach the Bluetooth unit to their shirt collar, insert the ear buds directly into the unit, and use the built-in microphone to speak. The single ear bud that comes standard with the unit may be employed or users may plug in their own ear buds.

Comfortable and Ergonomic Device

With a comfortable and secure fit for long work shifts, the Bluetooth Covert Earpiece provides mobility with no cumbersome wires or cables. The PTT unit attaches to the user's clothing to allow convenient access to wireless audio features.

Flexible Controls

Controls are arranged for easy access. The device provides a range of features to meet the requirements of its users.

- Dual-color LED for operation status
- Large PTT button
- Distress button
- Volume control button

- Multifunction button for Power On/Off and Pairing
- Auto-shutoff after 5 minutes if not paired.
- Indicator tones for the following:
 - Volume changes
 - Out-of-range warnings
 - Successful Bluetooth pairing
- Inconspicuous clear-tube earpiece
- 3.5 mm Audio Jack for compatibility with the earpiece or standard ear buds
- Shielded Microphone for excellent audio in loud environments
- Rechargeable Li-Ion battery and power supply for >12-hour shift life, with standby of 150 hours
- Clothing clip that rotates a full 360 degrees for easy placement and mobility
- USB charging port with protective cover

Durable Construction

The durable yet lightweight construction of the Bluetooth Covert Earpiece withstands the rigors of mission-critical use.

General Specifications

Approximate Weight:

1.4 oz (39.69g)

Operating Temperature Range:

+5 to +131°F
(-15 to +55°C)

Storage Temperature Range:

-22 to +158°F
(-30 to +70°C)

AC Charger Range:

100-240V; 50-60 Hz

Battery Charge Time:

3 hours

Clothing Clip:

Rotates 360°
